SKILLS

Languages: Python, Java, JavaScript
Tools/Platforms: Jupyter Notebook, MySQL, Scikit-learn, TensorFlow, Git, GitHub, Docker, FastAPI, NLTK
Soft Skills: Problem-Solving, Adaptability, Leadership, Time Management

INTERNSHIP

Infosys | AI & ML Intern | *GitHub* Nov 2025 – Jan 2026

- Contributed to AI-NutriCare diet recommendation system by developing healthcare solutions using ICU patient time-series data and personalized clinical insights; engineered a leakage-free LSTM risk prediction model achieving ~92% accuracy through stratified validation and class-balanced training.
- Processed unstructured medical documents using OCR, NLP, and table parsing to extract dietary constraints, clinical observations, and patient-specific nutritional requirements for personalized recommendations.
- Integrated FastAPI with Hugging Face LLMs to generate explainable multi-day personalized diet plans through modular REST APIs, while following Git-based version control, clean coding practices, and modular software design for scalable backend and frontend integration.

Tech: Python, TensorFlow/Keras, LSTM, FastAPI, NLP, OCR, Hugging Face LLMs, REST APIs, React.

PROJECTS

AI Risk Manager| AI & ML | *GitHub* Aug' 26

- Built a leakage-safe XGBoost-based payment fraud risk model on approximately 590K IEEE-CIS transactions, achieving 0.90 ROC-AUC and 0.94 accuracy on a held-out 88K test set using chronological splits, behavioral feature engineering, and class-balanced training.
- Developed behavioral anomaly and graph-based risk analysis to identify unusual transaction patterns and suspicious relationships across cards, devices, emails, and transactions, complementing supervised fraud predictions with additional risk signals.
- Architected a modular FastAPI-based AI Risk Agent that combines ML signals, cost-aware decisioning, deterministic policy guardrails, explainable risk reports, and human-in-the-loop review to recommend Allow, Verify, Review, or Block actions in real time.

Tech: Python, XGBoost, Scikit-learn, Isolation Forest, FastAPI, Graph, LLM, REST APIs, React, SQLite.

YouTube Transcript AI Chatbot | Generative AI & RAG| *GitHub* Jun' 26

- Developed a Retrieval-Augmented Generation (RAG) chatbot using LangChain to answer user queries from YouTube video transcripts through context-aware semantic retrieval.
- Built an end-to-end pipeline integrating YouTube Transcript API, Hugging Face Embeddings, FAISS, and TinyLlama to generate transcript-grounded responses with reduced hallucinations.
- Designed a responsive Flask-based web application with an interactive chat interface for real-time transcript loading and conversational question answering.

Tech: Python, LangChain, FAISS, Embeddings, TinyLlama, Transformers, YouTube Transcript API

CERTIFICATES

- Robotic Process Automation | *Automation Anywhere* Nov' 25
- Data Structures and Algorithms | *Certificate*, *LeetCode* Jun' 25
- Networking | *Coursera* Aug' 24
- Python | *DevTown*, *HackerRank* Nov' 23
- Advanced Diploma in Computer Applications | *Micronet Computer Software & Hardware* Jan' 22

ACHIEVEMENTS

- **Grammar Contest Winner |** *Certificate*
  Secured first prize in an English grammar contest among 200+ participants at LPU.
- **Patent Accepted:**
  Contributed to a patented research project on a Fuzzy Logic-Based Multi-Layered Intelligent Fireproof Fabric, integrating AI-driven hazard detection, adaptive cooling, and IoT-enabled safety mechanisms.

EDUCATION

- **Lovely Professional University** Phagwara, Punjab
  Bachelor of Technology - Computer Science and Engineering (AI & ML); CGPA: 7.8 Since Aug'23
- **Quazi Ahamad Inter College Jaley** Darbhanga, Bihar
  Intermediate (PCM) Percentage: 75% Mar' 21 – May' 23
- **Krishan Dhari Kedarnath High School Kharka Sitamarhi** Sitamarhi, Bihar
  Matriculation Percentage: 73.6% Mar' 20 – May' 21
